<b>State commissioners</b>	Erwin GRUBER Michael MANHARD, HR Dr.
<b>Auditor</b>	ERNST & YOUNG WIRTSCHAFTSPRÜFUNGSGESELLSCHAFT MBH
<b>Custodian bank</b>	Erste Group Bank AG

## Dear Shareholder,

We are pleased to present you the following semi-annual report for the Advisory One mutual fund pursuant to InvFG for the period from 1 April 2011 to 30 September 2011.

## Development of the Fund

In the reporting period, the challenges in Europe and the US had a negative impact on the performance of the fund. Advisory One delivered a performance of -15.43% (NAV 9.59) in the 2011 reporting period. The MSCI global equity index generated a comparable result of -13.18% in EUR terms.

We drastically reduced the leverage in equities during the reporting period and considerably decreased the fund's risk of losses through temporary hedges via the German and American equity index.

The US reached its legal debt limit at the end of July and was then hit by a downgrade of its AAA credit rating by the rating agency Standard & Poor's. The Fed also failed to initiate another round of quantitative easing and thus remained below market expectations.

The simultaneous global economic downturn also poses the risk of another recession for Europe and the US. China's growth is being hampered by the high inflation rate and offers additional uncertainty for the global markets as a result of the problems arising in the real estate market.

The ECB's concentration on the hard euro is forcing the Member States to make perilously dramatic budget cuts in order to reduce new debt. Expenditure cuts and higher taxes will decrease purchasing power in Europe and will leave little room for economic growth. The increased uncertainty on the markets caused a flight to supposedly safe assets (Swiss francs, gold and property).

The crisis brought countries to the brink of creditworthiness and has now taken away an important source of stimulus for the markets for a longer period of time.

The countries must now bring their expenditures in line with their income and will not be able to continue to use debt to pay for their popular political programmes..

Besides the amount of debt, the global financial capacity of countries is increasingly becoming the main topic of discussion. To solve the problems related to debt, unemployment and growth over the medium term, the countries will have to decrease their current account deficits.

### Outlook

In this complex environment, we can expect greater fluctuations on the markets and must also take into account higher risks in terms of established factors (profit, growth, competitive position) as well as the increasingly important external factors (tax base, taxes on resources, transaction taxes, etc.).

We will leave the leverage of the fund below 50% in the coming months and will only increase the equity positions once an easing and trend reversal are in sight. However, if the markets decline more intensely in the coming months, we will anticyclically increase the positions in selected market leaders.
